## **General Fund Summary**

FY25 General Fund revenues exceeded the amended budget by ten percent, while expenditures ended the yeart four percent under the amended budget. Significant variances by revenue and expenditure category are discussed on page 2.

The healthy unassigned fund balance discussed below keeps the city in a good position to weather economic uncertainties and address capital funding needs. Staff will provide recommendations on potential uses for unassigned fund balance above the required reserve level during the upcoming FY27 budget process.

## **General Fund Unassigned Fund Balance**

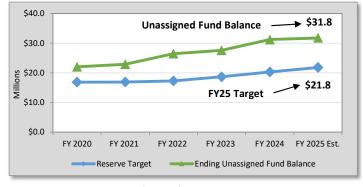

The FY25 estimated ending unassigned fund balance equals \$31.8 million, which is \$8.3 million above the FY26 target. This amount factors in the \$2 million committed on the FY26 adopted budget ordinance, as well as \$2.3 million assigned for purchase orders that rolled fom FY25 to FY26. Unassigned fund balance above the reserve target can be used for one-time needs. Given recent discussions on the King Farm Farmstead property, other unfunded capital needs such as RedGate Park, and the current budget planning process, staff recommends that this reserve balance be held for discussion in the context of needs presented in the FY27 through FY31 CIP budget.

#### **General Fund Contingency Status**

Per the city's Financial Management Policies, contingency funds are available for unanticipated, unbudgeted expenditures of a non-recurring nature and/or unexpected cost increases.

Operating costs were under budget primarily due to lower than budgeted processing and dump fees as well as unused contingency funding. The capital outlay budget included funds for equipment ordered but not received in FY25; that funding will be rolled to FY26 on the November budget amendment. Other costs exceeded budget due to higher than estimated depreciation costs.

<sup>&</sup>lt;sup>1</sup>Capital outlay purchases and operating leases with useful lives of more than five years are capitalized and depreciated or amortized in accordance with Generally Accepted Accounting Principles (GAAP). The City's financial statements reflect this adjustment, whereas this report shows the actual expense. As a result, the prior year actuals shown on this report in enterprise funds will differ from the financial statements in the amount of the cost of any capitalized assets or leases.

# Capital Improvements Program (CIP) Transfers, All Funds

The City's Financial Management Policies allow the City Manager to approve transfers of unspent project appropriations between capital projects within the same fund. These transfers will always net to zero, as any change in total appropriation by fund must be approved by the Mayor and Council through an appropriations ordinance. Any transfers between projects during the reporting period are shown below.
