# Summary of Written Testimony for the FY 2027 Budget Process As of 10/20/2025

Exhibit	Name	Individual/ Organization	Issue(s)
1	Paula Strange	Individual	Propose-a-Project Submission: Open fence at Princeton Place and Montgomery College
2	Brandon Farrar	Individual	Propose-a-Project Submission: Install Port-a-John at Welsh Park
3	Brandon Farrar	Individual	Propose-a-Project Submission: Replace above ground storm drain at Chesnut Lodge Park
4	Jonathan Young	Individual	Propose-a-Project Submission: Add streetlights on Friendship Lane
5	Anika Halota	Individual	Propose-a-Project Submission: Signage and path clearing for public right of way between MD-28 and Anderson Ave
6	Miguel Lago	Individual	Propose-a-Project Submission: Twinbrook Train Sound Barrier
7	Andrew Chang	Individual	Propose-a-Project Submission: Hungerford Neighborhood Traffic Calming
8	Dan Seaman	Individual	Propose-a-Project Submission: Traffic circle at Gail Ave and Lewis Ave
9	Nancy Erickson	Individual	Propose-a-Project Submission: Shade for Playground at Broome Athletic Park
10	Karine Reiter	Individual	Propose-a-Project Submission: Improve access of Kinship Park from Rockville Town Center
11	Cindy Fishman	Individual	Propose-a-Project Submission: Wootton Pkwy ped cross walk at Horizon Hill Park
12	Jake Jakubek	Individual	Propose-a-Project Submission: Roundabouts on Grandin Ave
13	Michael Northridge	Individual	Propose-a-Project Submission: Extension of Potomac Woods Park southeast trail to Seven Locks Road
14	David J. Smith	Individual	Propose-a-Project Submission: Welcome to Silver Rock Sign
15	Mark Radel	Individual	Propose-a-Project Submission: Thompson Dairy Way/Crooked Creek Drive Footbridge
16	Paula Strange	Individual	Propose-a-Project Submission: Open the fence at Montgomery College
17	Derek Grabhorn	Individual	Propose-a-Project Submission: Expand W Montgomery Ave Ramp
18	Sarah Pomerantz	Individual	Propose-a-Project Submission: Pedestrian crossing markings at Monroe and Mt Vernon Place
19	Marilyn Madden	Individual	Propose-a-Project Submission: Speed Camera or Traffic Light Needed at Muncaster Mill Road and Applewood Lane
20 21	Janice Dunlap	Individual	Propose-a-Project Submission: Beautifying a median on Hungerford Drive
22	Emily Lincoln David Serway	Individual Individual	Propose-a-Project Submission: Stoplight at Mt Vernon  Propose-a-Project Submission: Culdesac Beautification at end of Baylor Avenue
23 24	Frank Cole Chris Lafferty	Individual Individual	Propose-a-Project Submission: Crape Myrtle Replenishment - Cabin John Stream  Propose-a-Project Submission: Disc Golf Practice Range for Bullard Park
25	Megan Feng	Individual	Propose-a-Project Submission: Decrease seasonal allergies with female trees
26	Justin Brandon	Individual	Propose-a-Project Submission: Leading Pedestrian Interval at intersection of Hurley & Route 28
27	Jeffrey McCreight	Individual	Propose-a-Project Submission: Falls Road Park playground resurfacing
28	Edina Moy	Individual	Propose-a-Project Submission: Pickleball Nets at Woottons Mill Park Tennis Courts
29	Kathleen Kleinmann	Individual	Propose-a-Project Submission: Upgrades to bus shelters/stops
30	Kelly Paisley	Individual	Propose-a-Project Submission: Handicap ramps on Sunrise Drive
31	Charles Short	Individual	Propose-a-Project Submission: Richie Parkway-Cabin John Creek Walkable Nature Path
32	Clara Ni	Individual	Propose-a-Project Submission: Speed Bumps on Gruenther Ave
33	Zach Feiger	Individual	Propose-a-Project Submission: Dog park along Elwood Smith Park
34	Kevin Gabrielson	Individual	Propose-a-Project Submission: Croydon Creek & Red Gate Connectors to Rock Creek Trail
35	Stephana Ney	Individual	Propose-a-Project Submission: Woodley Gardens Park Steps Relacement
36	Michael Jeter	Individual	Propose-a-Project Submission: Sidewalk for missing stretch of Viers Mill
37	Phil Kuljurgis	Individual	Propose-a-Project Submission: Exercise equipment at Elwood Smith Park
38	Tom Temin	Individual	Propose-a-Project Submission: Road calming Sunrise Drive
39	Elizabeth Oka	Individual	Propose-a-Project Submission: Improvement of Rockcrest park facilities and amenities
40	Glenn Fellman	Individual	Propose-a-Project Submission: Modernizing the City of Rockville Flag: Removing Confederate Symbolism for an Inclusive Civic Identity
41	Emily Brooks	Individual	Propose-a-Project Submission: Speed Bumps on Twinbrook Parkway
42	Mindy Chong	Individual	Propose-a-Project Submission: Shade and Space for All to Gather at Bullards Park
43	Stephanie Richardson	Individual	Propose-a-Project Submission: Dog Cleaning hub at King Farm
44	Sophie Wonderly	Individual	Propose-a-Project Submission: Crosswalk at First St and Lynn Ct
45	Fran Miller	Individual	Propose-a-Project Submission: Street Lighting College Gardens Sidewalks
46	Amanda Collinson	Individual	Propose-a-Project Submission: Off leash park for dogs
47	Ebonie Murphy	Individual	Propose-a-Project Submission: Park Improvements at Scotland Community Park
48	Lorna Sanchez	Individual	Propose-a-Project Submission: Dog Park in West End
49	Guy Kenvo	Individual	Propose-a-Project Submission: Outdoor Exercise Station at Montrose Park
50	Limin Wang	Individual	Propose-a-Project Submission: Remove the portable bathroom at the Montrose Park Playground

#### **Describe Your Proposal\***

I'm submitting this proposal to request the installation of a portable restroom at Welsh Park. Currently, there are no restroom facilities available at the park. As a result, children—particularly boys—often end up using the woods when nature calls. This is not ideal from either a cleanliness or safety standpoint. Adding a simple portable restroom would go a long way in making the park more family-friendly and accessible. It's a small change that could significantly improve the experience for kids, parents, and anyone spending time at the park. It would also help ensure the park remains a welcoming, well-maintained community space. Thank you for considering this request.

This proposal addresses the lack of restroom facilities at Welsh Park, which impacts both children and adults who use the park regularly. Currently, there are no restrooms on site, leading children—particularly boys—to use the surrounding woods, which is unsanitary and inappropriate. Additionally, the park hosts various adult sports leagues whose participants have no access to restrooms during practices or games. Installing a portable restroom would provide a clean, safe, and convenient solution for all park users. It would enhance the overall experience, promote public health, and support the continued use of the park by families and organized sports groups alike.

Approximately how many people would your proposal se

Proposal Title*	
Replace above ground storm drain	
Proposal Location*	
Northwest Corner of Chesnut Lodge Park (near 52	22 w. Montgomery)

## Describe Your Proposal\*

I propose the City fix its only above ground storm drain. I would like it to see diverted underground or some type of underground detention system installed (I.e. Stormtech or R-Tank). There is too much standing water which is increasing the amount of mosquito and gnats in the neighborhood Nextdoor (Thirty Oaks Subdivision).

This solves the problem of that area of the park flooding and having standing water where insects can breed rapidly.

#### Approximately how many people would your proposal serve?\*

Unknown, many people use this park or walk this area. There are at least 11 houses in the subdivision that it would help out.

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

No, being that it's city property, it would not directly impact private property.

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

Proposal Title*
Friendship Lane
Proposal Location*
Mt. Vernon Park, adjacent to Richard Montgomery High School

#### Describe Your Proposal\*

Street lights can make a city more walkable, especially in the evenings and at night. There is a pathway, along Mt. Vernon Park, adjacent to Richard Montgomery High School. It's very common for high school students and residents to use this path as they walk to school, the Town Center, and the metro from the various neighborhoods south of Richard Montgomery High School. I propose that they city install various street lamps along the pathway to make the city more walkable in the evenings and at night.

The pathway along Mt. Vernon Park is a pleasant stroll during the daytime along a creek with many trees. However, at night, the pathway is pitch black. It's a pathway that many high school students use to walk from their parked cars (behind the tennis courts), or from their homes in the neighborhoods behind the school (like my daughters). Many avoid this pathway in the evening because it's completely dark. I don't feel comfortable asking my daughters to walk home along this path in the evening, and they, like many students, don't feel comfortable either. They would feel safer if they could see their surroundings. I imagine this would apply for most residents, especially the elderly who might worry about tripping. I walk along with this path on my way back from the metro at night, and I'm consistently the only one on the path. I usually use my flashlight on my cell phone, which is not a great solution.

#### Approximately how many people would your proposal serve?\*

200 students on a daily basis during the school year, and probably 50 residents on a daily basis.

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

No.

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

I think it fits within the Pedestrian Master Plan. In that plan, I noticed there is mention of work on the "Blandford Street Pedestrian Extension." I'm not sure if that's the same pathway, but it's very near.

Proposal Title*	
Signage and path clearing for public right of way between MD-28 and Anderson Ave	
Proposal Location*	
Forest Ave between MD-28 and Anderson Ave	

#### Describe Your Proposal\*

Add a road/path sign at the intersection of Forest Ave and the public alley (between MD-28 and Anderson Ave) to make it clear to the public that this is a public path. Clear 1-2 trees (+bamboo shrubbery) that are in the middle of this path before it hits the paved road to make it more accessible and obvious that it is a public path. Grade the ramp from the sidewalk to the public road in the alleyway to make it accessible for wheelchair users and reduce tripping hazards. Consider lightly paving or clearing a more obvious trail between the two portions of asphalt (the driveway ends at grass, then picks up about 30 feet later with the alleyway road). Also add signage at the other access points to this path (Laird, Mannakee, Nelson). Additional improvements may also be desirable between Nelson st and Mannakee, but I am less familiar with this section.

The alleyway between MD-28 and Anderson Ave is a public road and a nice, safe, car free area for people to take a walk and children to safely access the houses on these roads (especially MD-28, as walking along there is dangerous and unpleasant). However, the access point at Forest Ave is not clearly marked and many people are unaware that they are allowed to go here. Make it more obvious, so that people are not worried about using this public road, and so that everyone can enjoy this nice path.

Proposal Title*
Hungerford Neighborhood Traffic Calming
Proposal Location*
Hungerford Neighborhood

### Describe Your Proposal\*

With closure of some left turn areas (which was needed) and speed camera, people have been driving through the neighborhoods to get around the changes. This causes people to fly through the neighborhood. I am proposing traffic calming measures be installed in the neighborhood. Such as: Bulb-outs at intersections to protect pedestrians; Roundabouts installed at certain intersections: Ritchie Pwky & Brice Rd; W Edmonston Dr & Welsh; Ritchie Pwky & E Jefferson St.

What need or problem does this proposal address or solve?	What nee	d or	problem	does	this	proposal	address	or solve?

Proposal Title*
Shade for Playground at Broome Athletic Park
Proposal Location*
Broome Athletic Park Playground

#### Describe Your Proposal\*

When the weather is hot, the playground at the Broome Athletic Park off of Twinbrook Parkway is unusable. There is no shade (natural or man-made) so the primarily metal playground is dangerously hot for kids to touch. I propose city funds construct a man-made shade over the playground so that it stays cool when the weather is hotter so that local families can safely use it. As climate change continues to make summers hotter and longer, improvements like this will be more and more necessary.

What	need	or	problem	does	this	proposal	address	or solve?
* * * * * * * * * * * * * * * * * * * *	III C C C	U.	DIODICHI	uves	6 8 8 8 13	PIODOSMI	add a coo	OI SOLVE.

The playground is too hot during the summer to play on.

#### Approximately how many people would your proposal serve?\*

However many people live in the Twinbrook neighborhood. Lots of local communities use the park for baseball games etc. and their kids want to play on the playground while the baseball games happen

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

N/A

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

No, public property

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

lame of Group (if request is on behalf of a group)
roposal Title*
Improve access of Kinship Park from Rockville Town Center
roposal Location*
Kinship Park, 260 N Washington St

#### Describe Your Proposal\*

Improve access of Kinship Park from Rockville Town Center through the following: • Remove the chain link fence on the Beall Ave side of the park. • Remove the center tree along the Beall Ave side of the park (there are currently 3 trees on that edge). • Build a path on the grassy area from Beall Ave to the play structure. Increase safety and visibility of the park through the following: • Remove the two trees overhanging the play structure. • Create an inviting entrance from Beall Ave. • Improve the crosswalk on Beall Ave in front of Kinship Park by either raising this crosswalk or installing a light beacon. Revitalize the park by replacing the aging play structure.

While Rockville Town Center has an open space for children to run and climb on the rocks in the central square, it does not have an easily accessible and inviting playground. When my children were toddlers we would go to the splash fountain, but it does not turn on until 11 am, which is quite late for a toddler. Having a park we could go to while we wait for the fountain in the summer or simply a park for the winter months would have been nice. Even now, with my oldest being 11 years old, it would be nice to have a park to stop at when we hang out at Rockville Town Center. I have taken my kids to Kinship Park once. It is dark and uninviting. It is accessed either through a parking lot on Beall Ave or across from the Shell gas station on N Washington St. Sometimes there is one or more people loitering in the park. I have never seen children playing there. While I am usually against cutting down trees, this park has no direct sunlight. The play structure is brown and drab. My children do not like the vibe of this park. This proposal would take down 3 of the dozen trees in the park. I feel that with a few improvements, Kinship Park could be an open and inviting park that families would use when in the area.

#### Approximately how many people would your proposal serve?\*

There are hundreds of families who live in or visit the Rockville Town Square area.

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

No. There is private property surrounding the park, but the changes would not affect surrounding property.

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

There is no existing CIP project for Kinship Park however there is a budget for Playground Structure Replacement.

Proposal Title\*

Extension of Potomac Woods Park southeast trail to Seven Locks Road

#### Describe Your Proposal\*

Am submitting this proposal in response to request for ideas for possible neighborhood improvement projects that could be considered during the next budget season. The city's park currently has a trail in its southeast corner that ends just shy of Seven Locks Road. The proposal is to extend the trail to Seven Locks Road. (To be clear, the proposal does not involve the park's northeast corner and, e.g., Locks Pond Court or Oakenshire Drive which already have trail connections.)

Southeast corner of Potomac Woods Park (roughly fifty feet north of Montrose Road)

The proposal would significantly improve visitor access to Potomac Woods Park. At present, visitors currently either must drive into the park via Stratton Drive entrance (north) or walk in via Dunster Lane entrance (west) or Oakenshire Drive (northeast). There is no access via the southeast corner, which results in visitors having to walk all the way up Seven Locks Road and then Twin Oaks Drive and then Oakenshire. Or to walk Montrose Road and thread their way to Stratton Drive.

#### Approximately how many people would your proposal serve?\*

Unknown. Rough guess = several hundred?

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Not really. The non-profit Friends of Cabin John Creek (FOCJC) group might, however, have some interest. FOCJC serves as a steward for the main creek and its tributaries (www.cabinjohncreek.org); this proposal's location tracks Bogley Branch, which is a significant tributary to Cabin John Creek, FOCJC organizes stream/trail volunteer cleanups in the city of Rockville, including at this park. It also sponsors an annual trail walk along much of the Creek but Potomac Woods park's trail is not included largely because there is no trail connection to Seven Locks Road.

# Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

No, the proposed project would not directly impact any private property. The trail currently ends just shy of a public sidewalk on Seven Locks Road.

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

The proposal does not appear to fit within any of the existing CIP projects.

Proposal Title*
Thompson Dairy Way/Crooked Creek Drive Footbridge
Proposal Location*

In the wooded area between Crooked Creek	Drive and	Thompson	Dairy 1	Way,	connecting	Cork	Tree and
Longhorn Crescent		•	•	•	•		

#### Describe Your Proposal\*

My family and I are longtime residents of Rockville (22+ years), and more specifically, the King Farm neighborhood. Rockville has been a wonderful place to live, work, and raise our family! We really enjoy taking walks around our neighborhood when the weather is nice and we greatly appreciate the (newly rebuilt) footbridge that connects Creek Valley Lane with Barnside Place. It makes it so much easier to get around that part of the neighborhood! I propose the construction of a similar footbridge across the wooded reforestation area between Crooked Creek Drive and Thompson Dairy Way, creating a new path approximately connecting Cork Tree Lane and Longhorn Crescent on either side. The design and appearance of the footbridge could mirror the Creek Valley Lane/Barnside Place footbridge, likely saving funds on design (and possibly engineering) costs.

#### What need or problem does this proposal address or solve?\*

It unifies the two sides of the neighborhood that are currently bisected by the reforestation area, greatly improving overall walkability in a neighborhood that was designed specifically to be a walkable community. It would also be a huge help every weekday morning and afternoon for the schoolchildren that need to catch buses at stops located on one side or the other of the reforestation area.

#### Approximately how many people would your proposal serve?\*

~10,000 residents of the King Farm neighborhood, plus visitors and guests

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

This project would not impact any private property.

## can be found in the city's budget document on the city's website.)\*

I have been told by Jessica Corazza with the City of Rockville that this proposal does not fit within any existing projects or other city funding.

Open the fence at Montgomery College
Proposal Location*

End of Clemson Court adjacent to the campus
Describe Your Proposal*
Please open the fence. This will cost nothing. The environment has greatly changed since the fence was closed. The college has much more parking, and anyone who still smokes has adjusted to the College's nosmoking rules. Please open the fence.
What need or problem does this proposal address or solve?*
Residents and students will be able to cross freely to and from the college.
Approximately how many people would your proposal serve?*
10,000
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?
Does this project directly impact any private property? If so, do the owners of those properties support the project?*
There is a home next to the fence. The prior owners were upset that students came onto the College Gardens side of the fence to smoke. Again, it is unlikely that this situation would recur; however, it would be a simple step to close the fence if this homeowner found it to be a problem.
Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects an be found in the city's budget document on the city's website.)*
No

Proposal Title*
Expand W Montgomery Ave Ramp
Proposal Location*

W Montgomery Ave
Describe Your Proposal*
We should expand the highway entrance ramp off of W Montgomery Ave to 270 South near the Shell station at 1250 W Montgomery Ave. Right now, W Montgomery Ave has three lanes going south at this location, and only the right one exits to the 270 south ramp. About 500 feet after the right lane separates to the on ramp, it opens up into two lanes. It makes no sense to compact down to one lane, then open back up into two lanes. It causes so much traffic build up during rush hour times. The middle lane of W Montgomery Ave here should be a forked lane where you can choose to keep right onto the metered 270 S ramp or continue left on W Montgomery further. It can't be a space issue because the space for the second lane is basically already paved under the pedestrian bridge there, only a sliver of green area needs to be turned into road and it would make a huge difference in alleviating traffic.
What need or problem does this proposal address or solve?*
Traffic build up from unnecessarily compacting to one lane then immediately re-expanding to two. This causes an unnecessary bottleneck, and it causes people to cut others off to try and get around, causing even more traffic.
Approximately how many people would your proposal serve?*  Thousands
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Speed Camera or Traffic Light Needed
opeed Camera of Traine Light Needed
Proposal Location*

Muncaster Mill Road and Applewood Lane
Describe Your Proposal*
This is the intersection where a woman was killed a few weeks ago. The road is rather curvy around there and I believe we need either a traffic light or one or two speed cameras just before and just after this intersection on Muncaster Mill Rd. There are a couple of schools and a church very close by as well.
What need or problem does this proposal address or solve?*
The need to not have anyone else (pedestrian) killed by a car around this curvy road. Also when exiting Applewood Lane (my street), it is very difficult to see if any traffic is coming on Muncaster Mill Rd to the left of me.
Approximately how many people would your proposal serve?*
Have no idea.
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?
Does this project directly impact any private property? If so, do the owners of those properties support the project?*
No, does not impact any private property.
Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)*

Proposal Title*
Beautifying a median
Proposal Location*

355 (Hungerford)
Describe Your Proposal*
The concrete median heading north on Hungerford Drive (355, starting on the median across the metro parking and ending at the intersection of Beall Avenue (or possibly continuing further north on 355) is unsightly and boring. As studies have shown, tree-lined streets (which include medians) reduce street temperatures, help mitigate air pollution from cars, and provide beauty to the area. If it is too expensive to dig up the concrete to plant colorful trees providing shade and absorption of CO2, at least some of the beautiful large planters (similar to those found around our beautiful city center) would help beautify the center median/street. Beautiful medians make a street attractive and add to the beauty of a main thoroughfare, and further bring attention to a city center. A secondary suggestion to the beautification of that area would be placing a large colorful ROCKVILLE sign on the bridge that crosses over at the metro intersection (Park Road). Anyone driving north or south on 355 would see the large sign welcoming them to Rockville (and the Rockville metro/Marc train area).
What need or problem does this proposal address or solve?*
Beautification of medians, by replacing concrete with shade-providing CO2-absorbing trees on our main thoroughfares, thereby reducing road heat as the temperatures continue to rise.
Approximately how many people would your proposal serve?*
Residents of Rockville
f request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or signed petition) if requested?
Does this project directly impact any private property? If so, do the owners of those properties upport the project?*
No (unless the sign on the bridge involves the metro or train property).

Baylor Ave Culdesac Community
Proposal Title*
Culdesac Beautification

#### Describe Your Proposal\*

Neighbors with/without kids and friends within this neighborhood, like many others in the surrounding areas referenced as College Gardens, have gatherings for discussions, sometimes just with their kids on trikes, social meetings, etc. where have a central location more close to home is better tollerated due to time availble. We would like to transform this weedy mess of a culdesac into a meaningful spot dressed up with 4 adirondack chairs, table in center as well as with Potted plants and shrubs. Foundation in center should be river rocks to have have nice drainage and eliminate the need to mow which currently doesn't happen. The location can not grow trees with deep roots currently and has minimal to liitle through traffic which is at the end where the culdesac is attached to Columbia Avenue. Discussed this with the neighbors and they are all in on this idea. This would be a tremendous idea to also implement in other areas in College Gardens which brings the Neighborhood together with the Neighbors.

#### What need or problem does this proposal address or solve?\*

Eliminates the need for City Maintenance like Mowing or tree trimming, edgeing therefore reducing city costs. Beautifies the neighborhood where houses have nearly doubled in the past 3 years. Keeps young families active and together without the long hike to the park since time is limited due to both parents working. Social gatherings would be increased and better neighbor communications with one-another. Improved vision for neighbors with the cleaned up area providing a safer community. A space for beautiful ties and bridging social interactions.

A	pproxi	imatel	y hov	v many	peopl	e would	d your	proposal	serve?*

Hungerford Landscape Committee
Proposal Title*
Crape Myrtle Replenishment - Cabin John Stream

From bridge to Dogwood Park along Cabin John Stream to Stone Ridge sig	From bridge	to Dogwood	Park along	Cabin John	Stream to	Stone	Ridge:	sign
--	-------------	------------	------------	------------	-----------	-------	--------	------

#### **Describe Your Proposal\***

In 2015, the Hungerford Landscape Committee and volunteers donated the funds and provided the labor to install 17 Crape Myrtle "Sioux" along the eastern bank of Cabin John stream essentially running the 800 block of Cabin john Parkway. Over the last few years we have lost 7 of those trees to beaver and deer. I would like to see these replaced and 2 additional trees at the bridge entrance to Dogwood Park. I have planted 3 American Redbud along the creek and would like this proposal to include 4 more Redbuds as well. I would mark the locations and see to it that the trees were watered. These trees should all be "Sioux" Crape Myrtles and be 6'-8' tall. It is possible to substitute with another pink variety if it blooms at the same time.

#### What need or problem does this proposal address or solve?\*

This project is more about a vision. When Japan donated hundreds of Yoshino Cherries to our country, to be planted along the Tidal Basin, it wasn't to solve a problem. It was to complete a vision, and a way of thanks, and add color and beauty to our landscape. I think eventually more aesthetic project ideas could continue down to Stone Ridge Pond and the walkway there. We have planted over 400 daffodil bulbs in this area along the creek and many people walk there and enjoy the Spring color. The Crape Myrtles, by blooming mid to late summer further add to the color in our community.

#### Approximately how many people would your proposal serve?\*

I think the entire Rockville community will enjoy seeing this ribbon of pink flowering trees flow along the creek

If request is on bel	nalf of a group, has this proposal been discussed and agreed on by your
neighborhood grou	ip? Could you upload supporting documentation (such as meeting minutes or
a signed petition) i	f requested?

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

The trees would all be planted on the green space easement outside of Dogwood Park and, once established, require no maintenance to speak of.

#### can be found in the city's budget document on the city's website.)\*

yes, trees and installation would be about \$450 a piece if furnished and planted and warranted by a landscape company.

Proposal Title*
Disc Golf Practice Range for Bullard Park
Proposal Location*

Rul	lard	Park	e

#### **Describe Your Proposal\***

I propose the installation of a single disc golf practice hole in our community park. The setup would include two permanent disc golf baskets positioned at opposite ends of a lightly wooded, unused green space. This design would allow residents to practice throws in both directions, simulating the experience of a full disc golf hole while maximizing the use of limited space. The area I would propose is currently unused, is well-suited with natural tree obstacles, and is safely distanced from both the playground and the walking path. The cost of installing two disc golf baskets, a tee pad and signage is modest (likely under \$3,000) compared to most park infrastructure projects, with minimal maintenance required once installed. The baskets are durable, weather-resistant, and can remain in place for many years with little upkeep. For a relatively low one-time investment, the community gains a long-lasting recreational amenity that broadens park use, promotes healthy activity, and delivers outsized value to a wide range of residents.

#### What need or problem does this proposal address or solve?\*

This proposal addresses the lack of recreational variety and accessible outdoor fitness options for teens and adults in our community. While the park already provides excellent amenities for young children (playground), basketball players and walkers (path), there are limited other facilities that appeal to older youth, young adults, and families looking for alternative forms of recreation. Disc golf is a fast-growing, low-cost, and family-friendly sport that promotes outdoor activity, physical exercise, and community engagement. A practice hole allows residents to try the sport casually without requiring access to a full course. It also provides a safe, inclusive, and healthy outlet that complements existing park amenities without interfering with them.

#### Approximately how many people would your proposal serve?\*

The practice hole could reasonably serve hundreds of unique residents each year, with the potential for frequent repeat use by regular players. It would add meaningful value to the park for a wide variety of residents who may not currently have a recreational option there.

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Proposal Title*
Decrease seasonal allergies
Proposal Location*

Townself-or-
everywhere
Describe Your Proposal*
Plant female trees anytime trees or greenery need to be planted. New parks, park renovations, street neighborhoods, encourage neighborhoods schools and communities to plant female trees.
What need or problem does this proposal address or solve?*
Many people are affected by seasonal allergies. Due to global warming spring starts earlier and lasts longer than before. Many people who never had allergies before now have allergies. Allergy symptoms can range from minor inconveniences to pretty serious reliance on daily medication. Allergy medications are not cheap. If we encourage more female trees the pollen would decrease and be a natural solution that many people would benefit from.
Approximately how many people would your proposal serve?*
A large amount of people. Majority of population
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?
Does this project directly impact any private property? If so, do the owners of those properties support the project?*
would not impact private property
Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)*

Proposal Title*
Leading Pedestrian Interval at intersection of Hurley & Route 28
Leading Fedestrial interval at intersection of Fidney & Route 26
Proposal Location*

Intersection of Hurley & Route 28
Deganiha Vann Branagal*
Describe Your Proposal*
I propose that the traffic signal at the intersection of Hurley & Route 28 (near OneLife Gym / Chik-Fil-A / etc) be upgraded so incorporate a leading pedestrian interval to encourage pedestrian crossing safety. I drive through this intersection almost daily and walk through it regularly as well. It is common to see vehicles turning left from Hurley onto Route 28 not properly yield to pedestrians who are crossing Route 28. I think an LPI would give drivers more of an opportunity to notice pedestrians so that they can properly yield to them, and also give pedestrians a head start to cross this large thoroughfare safely.
What need or problem does this proposal address or solve?*
Pedestrian safety, neighborhood connections, economic activity (people would feel more inclined to walk & bike to the businesses in the OneLife plaza).
Approximately how many people would your proposal serve?*
Over the course of a year this could make thousands of road crossings safer and more enjoyable. It could also induce pedestrian and bike trips in this area.
If request is on behalf of a group, has this proposal been discussed and agreed on by your
neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?
a signed petition) it requested.
Does this project directly impact any private property? If so, do the owners of those properties
support the project?*
No.
Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects

Proposal Title*
Respect for Bus Riders

I hroughout the City of Rockville
Describe Your Proposal*
The city of Rockville must raise the level of respect and appreciation that it shows for riders the bus system. Rockville should dedicate funding to upgrade bus stops to have more shelters, benches, larger concrete pads, trash receptacles, and electrical outlet for lighting and electronic charging, when possible. The placement of bus stops should also be examined to ensure that there is a safe street crossing area for return trips by bus. The City and County policy encourages the use of public transportation. However, relatively few bus stops have the amenities to help riders feel respected, safe, and protected. Bus drivers sometimes tend to overlook waiting passengers where there is only a bus stop sign without amenities. The population of Rockville will be increasing dramatically given the new housing in the pipeline. The City uses a ridged criteria for bus stop amenities that must be revised. Nationally, research has show dramatic increases in ridership with the addition of amenities. This research readily available by quizzing AI tools.
What need or problem does this proposal address or solve?*
Reluctance of city residents to ride bus system and other forms of public transit due to perceptions of social status, discomfort and concerns about safety.
Approximately how many people would your proposal serve?*
1000 or more
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?
Does this project directly impact any private property? If so, do the owners of those properties support the project?*
No

Richie Parkway-Cabin John Creek Walkable Nature Path

**Proposal Location\*** 

Bginning at Richie Parkeay dead end at West Edmonston to dead end at Leverton Street in the wood Cabin John Creek	s along

#### Describe Your Proposal\*

I propose a small project that would have a very large positive impact on the Hungerford community. The model I have in mind is similar to the nature path in Dogwood Park along the creek behind the tennis courts from Cabin John Parkway to Monroe Street. A short heavily- used nature path for all ages to use. I suggest a cleared, unpaved nature path from the end of Richie Parkway at Edmonston along Cabin John Creek to the end of Leverton, continuing to connect with the Stone Ridge Pond path.

Lack of nature v	/alk opportunities			
Approximately	how many people	e would your pro	oposal serve?*	
Greater Hunger	ord community.			
			(	

a signed petition) if requested?

Our civic association appears to be inactive. I have discussed with with a few others who walk in the community and they think it is a wise use of this city owned surplus property.

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

I don't believe so.			

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

Croydon Creek & Red Gate Connectors to Rock Creek Trail

Croydon Creek Nature Center & Rock Creek Trail		
Describe Your Proposal*		
Croydon Creek Nature Center and Red Gate parks have trails that get very close to Rock Creek Trail but do not directly connect. For Redgate, Avery road is not pedestrian safe so there is no access from one to the other. I propose a connector trail at the northeast corner of Redgate park to Rock Creek trail. Similarly, at Croydon Creek, the trail that ends near Rock Creek would be extended and have a bridge added to cross the creek.		
What need or problem does this proposal address or solve?*		
Increase access to parks, through passes, and around Rockville		
Approximately how many people would your proposal serve?*		
100s every day		
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or		
a signed petition) if requested?		
Does this project directly impact any private property? If so, do the owners of those properties support the project?*		
I don't know who owns land between Avery Road/Redgate/Rock Creek Trail, it is mostly forested beside the building adjacent to the park at the north property line.		
Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)*

Proposal Title*
Sidewalk for missing stretch of Viers Mill
Proposal Location*

South side of Viers mill, starting at Twinbrook Parkway
Describe Your Proposal*
I'd like to propose that the City of Rockville collaborate with the Maryland department of transportation to get a sidewalk built for a small stretch of Viers Mill road where it is missing. The section of Viers Mill where I wanted to request a sidewalk and/or bike path is on the south side of Viers Mill Road, starting about 300 feet from the intersection of Twinbrook parkway, and continuing until the bridge that goes over Rock Creek (near where the Twinbrook Connector Trail starts).
What need or problem does this proposal address or solve?*
The primary problem here is a major safety issue for pedestrians and cyclists. My concern is that there is no sidewalk, bike path, or even shoulder on the road for this short stretch, which is probably less than 500 feet, making it very dangerous for anyone to walk or bike along it.
Approximately how many people would your proposal serve?*
Probably several hundred over the course of each year
If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?
Does this project directly impact any private property? If so, do the owners of those properties support the project?*
No
Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)*
I don't believe so.

roposal Title*	ockville Flag: Removing Confederate Symbolism for an Inclusive Civic Identity

City-wide — the project concerns the official flag used at City Hall, municipal facilities, and public events across Rockville.

#### Describe Your Proposal\*

This proposal requests a one-time capital project to redesign and officially replace Rockville's current flag, which incorporates the red bottony Crossland crosses—a symbol that historically aligns with Confederate imagery. The new design would preserve the City's historic heritage while reflecting modern values of unity, inclusivity, and civic pride. Deliverables: Commissioning a design competition or working with a local graphic designer, historian, and community panel to create new flag proposals. Producing final design mockups, including digital renderings and physical prototypes. Replacing existing flags at City Hall, partner facilities, and public venues. Launching a public awareness campaign to introduce the new design and explain its significance.

#### What need or problem does this proposal address or solve?\*

Problem: Rockville's current flag prominently features six red bottony crosses, tied historically to the Confederate-aligned Crosland family symbolism. This association can be deeply alienating and distressing for community members—and contradicts post-2020 efforts nationwide to address Confederate symbols in public spaces. Need: There is no documented acknowledgment, public discussion, or historical interpretation from the City regarding the Confederate connections in the seal or flag design. A thoughtful redesign allows Rockville to demonstrate leadership, align with Montgomery County's and Maryland's actions in removing Confederate-linked symbols (e.g., street renamings, monument removals), and foster an inclusive civic identity moving forward.

#### Approximately how many people would your proposal serve?\*

All Rockville residents—over 67,000 individuals—plus visitors, civic stakeholders, and regional partners, effectively serving the entire community by affirming shared values and civic unity.

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

	 THE RESERVE TO THE RE
N/A	
I N/A	
1.41.	

Does this project directly impact any private property? If so, do the owners of those properties support the project?\*

No. The project involves municipal artwork and symbols displayed on public buildings and does not affect private property.

Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects can be found in the city's budget document on the city's website.)\*

No. This is a new one-time capital improvement initiative and does not fall under any existing CIP categories.

Thank you for submitting a proposal for the FY 2027 budget process. A summary of all proposals submitted will be provided to the Mayor and Council, the city manager, and applicable city department staff. Additionally, your proposal will be included as part of the FY 2027 budget public record beginning with the first budget public hearing in fall 2025. To follow the FY 2027 budget process, check the city's website to find dates of Mayor and Council work sessions and budget public hearings. These dates will be published once set by the Mayor and Council in the fall.

Proposal Title*
Speed Bumps on Twinbrook Parkway
Proposal Location*

Twinbrook Parkway between Baltimore and Veirs Mill		
Describe You	r Proposal*	
Add speed bu	mps to this stretch of Twinbrook Parkway, perhaps by elevating the existing crosswalks.	
What need or	r problem does this proposal address or solve?*	
This stretch in profile semi-ro	ve aggressively and at high speed on the stretch of Twinbrook between Baltimore and Veirs cludes two schools and numerous single family homes with young children. The existing low bundabouts at intersections don't deter this behavior. I would like to see speed bumps install sting crosswalks could become elevated? Bauer Drive is a good example of how Twinbrook gured.	
Approximate	ly how many people would your proposal serve?*	
	nbrook neighborhood!	
	*

Shade and Space for All to Gather at Bullards Park
ronosal Location*

Installation of shade structures, gazebo, and or some kind of covered patio at Bullards Park. Addition of 3-picnic tables under shaded areas to encourage family gatherings, picnics, and community use. This would support multiple neighborhoods that use the park/playground, such as: Rose Hill, Rose Hill Falls, Bullards Circle, Roxboro.  What need or problem does this proposal address or solve?*  Adding shade coverings and picnic tables is a simple yet impactful improvement that will make Bullard Parmore inclusive, enjoyable, and safe space for everyone in our community. Currently there is zero shade/gazebo/patio and only 2 picnic tables.  Approximately how many people would your proposal serve?*  There are over 350 homes that suround the park.  Frequest is on behalf of a group, has this proposal been discussed and agreed on by your eighborhood group? Could you upload supporting documentation (such as meeting minutes signed petition) if requested?  There are over 350 homes that suround the park.  Frequest is on behalf of a group, has this proposal been discussed and agreed on by your eighborhood group? Could you upload supporting documentation (such as meeting minutes signed petition) if requested?  Frequest is a stand alone park/playground.  Frequest directly impact any private property? If so, do the owners of those propertic apport the project?*  No. Bullard Park is a stand alone park/playground.	Describe Your Proposal*

Off leash park for dogs
oposal Location*

I propose the area between the tennis courts in Welsh Park and the baseball field be fenced and turned into an off leash area for dogs. There should be an area for dogs under 35lb, separated from a larger area for dogs over 35lb. The area in question does not have high traffic. It is close to the pool, so there should be relatively cheap water access. There is already one side fenced.  What need or problem does this proposal address or solve?*  The closest dog park is king farm. It is a drive for people in city centre. Welsh Park is half a mile from city centre where there are a lot of dogs in apartments. We are expanding our housing stock, and dogs need somewhere to socialize and be off lead.  Approximately how many people would your proposal serve?*  All rockville. Families with dogs have a place to go, Families without dogs don't have to worry about dogs being off lead in the street.  I request is on behalf of a group, has this proposal been discussed and agreed on by your eighborhood group? Could you upload supporting documentation (such as meeting minutes o signed petition) if requested?  Does this project directly impact any private property? If so, do the owners of those properties upport the project?*  No  Does your proposal fit within an existing CIP project? If so which one? (Existing CIP projects and be found in the city's budget document on the city's website.)*	an off leash area for dogs. Connecting

Wall St and bike path
Describe Your Proposal*
-
The south end of Wall St where it meets the bike path is connected by a dangerously unsmooth sewer drain. The proposal request is for a walker, biker, stroller, or other non-motorized traveler to be able to traverse from Wall St to the bike path safely. Currently, the anticipated walking path comprised of asphalt around the sewe drain is very uneven, contains large massive puddles that cannot be traversed without getting wet during or after a rainstorm.
What need or problem does this proposal address or solve?*
Pedestrian safety along an existing path
Approximately how many people would your proposal serve?*
100

Proposal Title*
Beall Avenue Beautification
Proposal Location*

	Beall Ave. and N.	Washington	St., near	Snowden's	Funeral	Home
--	-------------------	------------	-----------	-----------	---------	------

#### **Describe Your Proposal\***

I propose to relandscape and beautify the two beds with the "West End" sign in the median strip of Beall Ave. near N. Washington Street. At this time, the holly bushes are scraggly, dead or half-dead. The soil is bare and bone dry. The low-growing junipers in the beds are healthy and green but the beds have not had any flowers or pollinator plants in them for years. I feel sad every time I walk by them. I propose the following: Remove the dead holly bushes and prune the half-dead ones to rejuvenate and shape them. Add ten bags of Leaf Gro and topsoil to supplement and build the soil. Plant flowering, mostly native, perennials and annuals. We have evergreen Carex, mountain mint, monarda, anise hyssop, and other plants that I'd like to divide and contribute. I start seedlings of annuals each spring, such as deer resistant marigolds, basil, and alyssum. Mulch the area to conserve moisture and prevent weeds. The Rockville Maintenance Facility has free mulch. The median beds would need about 30 cubic feet/one cubic yard of mulch.

#### What need or problem does this proposal address or solve?\*

The proposal improves a sad, neglected eyesore and beautififies our community. The West End sign is the introduction to a large neighborhood. It could be beautuful and exciting. Pollinator flowering plants are good for the environment. They lift the spirits of people walking or driving by the beds each day. Mulching the beds would also improve the health of the two elm trees now planted in the beds.

#### Approximately how many people would your proposal serve?\*

The greater Rockville community.	7 30	

If request is on behalf of a group, has this proposal been discussed and agreed on by your neighborhood group? Could you upload supporting documentation (such as meeting minutes or a signed petition) if requested?

Thank you for submitting a proposal for the FY 2027 budget process. A summary of all proposals submitted will be provided to the Mayor and Council, the city manager, and applicable city department staff. Additionally, your proposal will be included as part of the FY 2027 budget public record beginning with the first budget public hearing in fall 2025. To follow the FY 2027 budget process, check the city's website to find dates of Mayor and Council work sessions and budget public hearings. These dates will be published once set by the Mayor and Council in the fall.
